

Office of Assistant General Counsel for Ocean Services  
N.O.A.A.  
1305 East West Highway  
Silver Spring, MD 20910

11/27/02

Dear Sirs:

- 1) Please enter into the record the Sixty letters in support of the New York Dept. of State Determination that the Millennium Pipeline proposal is inconsistent with the CZMA.
- 2) Please enter into the record 1500-1600 citizens listed on the enclosed signed petition forms also in support of the New York Dept. of State Determination that the Millennium Pipeline proposal is inconsistent with the CZMA.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Diane Kahn", written in a cursive style.

Diane Kahn  
2 Summerland Ln.  
Briarcliff Manor, NY 10510

## Petition

I sign this Petition to support the New York Department of State's decision, of May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and our region's drinking water. Secretary Evans, of the U.S. Dept of Commerce, should uphold the N.Y. Department of State's determination over any appeal!

## Petition to Keep High Pressure Natural Gas Pipelines Away from Schools

I sign this Petition to support the passage of Federal, State, and local legislation to prevent the placement of a high pressure Natural Gas pipeline near any school. The science of these pipelines warrant placement of a Zone of Safety at least 1500 feet in radius around any school to prevent the possibility of loss of life, should a pipeline explode from whatever cause.

I sign this Petition to support the New York Department of State's decision, of May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and our region's drinking water. Secretary Evans, of the U.S. Dept of Commerce, should uphold the N.Y. Department of State's determination over any appeal !

Says both  $\rightarrow$

## Petition

I sign this Petition to support the New York Department of State's decision, of May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and our region's drinking water. Secretary Evans, of the U.S. Dept of Commerce, should uphold the N.Y. Department of State's determination over any appeal!

## Petition

**I sign this Petition to support the New York Department of State's decision, of May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and our region's drinking water. Secretary Evans, of the U.S. Dept of Commerce, should uphold the N.Y. Department of State's determination over any appeal!**

## Petition

**I sign this Petition to support the New York Department of State's decision, of May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and our region's drinking water. Secretary Evans, of the U.S. Dept of Commerce, should uphold the N.Y. Department of State's determination over any appeal !**

## **Petition to Keep High Pressure Natural Gas Pinelines Away from Schools**

I sign this Petition to support the passage of Federal, State, and local legislation to prevent the placement of a high pressure Natural Gas pipeline near any school. The science of these pipelines warrant placement of a Zone of Safety at least 1500 feet in radius around any school to prevent the possibility of loss of life, should a pipeline explode from whatever cause.

## Petition

I sign this Petition to support the New York Department of State's decision, of May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and our region's drinking water. Secretary Evans, of the U.S. Dept of Commerce, should uphold the N.Y. Department of State's determination over any appeal !

## Petition to Keep High Pressure Natural Gas Pipelines Away from Schools

I sign this Petition to support the passage of Federal, State, and local legislation to prevent the placement of a high pressure Natural Gas pipeline near any school. The science of these pipelines warrant placement of a Zone of Safety at least 1500 feet in radius around any school to prevent the possibility of loss of life, should a pipeline explode from whatever cause.

## Petition

I sign this Petition to support the New York Department of State's decision, of May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and our region's drinking water. Secretary Evans, of the U.S. Dept of Commerce, should uphold the N.Y. Department of State's determination over any appeal!
